Exploring Past and Present: Perspectives on Societies and Cultures

*Curiosity about society and its institutions is central to an engaged life. In addition, informed citizens should have an understanding of individual and collective behavior in the past and present. To address the challenges facing the world today, citizens must understand how these challenges arise and the roles that individuals, communities, countries, and international organizations play in addressing them. **Learning how to pose appropriate questions, how to read and interpret historical documents and how to use methods of analysis to study social interaction prepares students to comprehend the dynamics within and among societies. These skills enable students to examine the world around them and to make historically, theoretically, and empirically informed judgments about social phenomena.***
